

Weekly Report

-- This week , I mainly report my status --

CEPC CMOS Pixel Sensor

-- Update of the firmware (for B-matrix)

-- adjust the format to that of “A” with the TUL (finally, it is done by Chenfei)

-- run simulation, verification/debug (most work was done by Chenfei & Liejian)

CEPC Data Analysis

-- Higgs2ZZ , deal with the ZH samples

-- run simulation/reconstruction from stdhep files

-- run analysis procedures... after that, found large background, and try to tune the cut.

Next week

- Join the test beam.
- I will visit DESY from 19th Aug. - 5th Sep.

Weekly report

- Run the telescope example in allpix2 and get the root file.

- Understand the parameters in the config files according to the allpix2 manual.

Lingteng

Plan

- Try to do the DESY telescope stimulation
