

Wanted

- Resolution problem, BESIII, dalitz analysis in Belle, new method.
- S-dependent BW, standard form, the meaning of different terms. Barrier factor form.
- Relation between angular distribution and invariant mass distribution on dalitz plot
- How to calculate the degree of freedom of a decay process, especially when the final states are not scalars.

- What kind of parameterization method can satisfy unity
- $\pi\pi$, $k\pi$, parameterization method
- Relation between poles and resonances.
