

# HGTD - IHEP AT CERN

Mhamad Kassem Ayoub

- The group at cern is composed of ~3 people (mainly from IFAE)
- The next test beam is on October
  - It is the last test beam at cern
  - Next tests will be done in Germany, USA,...
- I had a meeting with the Test Beam convener
  - Need to know how much time each one plan to dedicate for this effort
  - How long will Suyu stay here and are there other interested persons?
- The test beam needs almost full time month of preparation, test beam and then analysis
  - To do measurements to test some characteristics of the device: I-V, X-rays,...
