

14th International Conference on Calorimetry in High Energy Physics

Monday, 10 May 2010

materials & detectors II (14:00 - 16:30)

time	[id] title	presenter
14:00	[288] Radiopure Crystals for Double Beta Decay: Calorimetry at 10mK	Prof. FERRONI, Fernando
14:30	[192] Optimization of Crystals for Applications in Dual-Readout Calorimetry	Dr GAUDIO, Gabriella
14:50	[193] New developments in high resolving power W-Si calorimeters	Dr KISTENEV, Edouard
15:10	[194] Test beam studies of the W-Si tracking calorimeter for the PHENIX forward upgrade	Prof. KWON, Youngil
15:30	[195] Electromagnetic calorimeters of the CMD-3 detector	Mr EPIFANOV, Denis
15:50	[196] CCALT: crystal calorimeter at KLOE-2	HAPPACHER, Fabio
16:10	[198] The large-angle photon veto detector system for the NA62 experiment at CERN	Dr SPADARO, Tommaso
