

# 14th International Conference on Calorimetry in High Energy Physics

Tuesday, 11 May 2010

algorithm & simulation II (14:00 - 16:00)

| time  | [id] title   | presenter             |
|-------|--|-----------------------|
| 14:00 | [218] Simulation, reconstruction and low momentum muon/pion identification of the BESIII EMC | Mr HE, Miao           |
| 14:20 | [219] From raw data to physics results with ALICE PHOS                                       | Dr WAN, Renzhuo       |
| 14:40 | [220] Commissioning of the ATLAS Electron and Photon Trigger Selection                       | Mr DAO, Valerio       |
| 15:00 | [221] Multiresolution Jet Reconstruction with FFTJet   | Prof. VOLOBOUEV, Igor |
| 15:20 | [222] Simulation study of Forward Calorimeter in LHC-ALICE experiment                        | Mr HORI, Yasuto       |
| 15:40 | [223] A study on stochastic term of calorimetric energy resolution                           | Dr TAPAN, ILHAN       |
