Partonic structure of neutral pseudoscalars via two photon transition form factors

Saturday, 17 August 2019 15:15 (20 minutes)

In this talk, I will present the study on two photon transition form factors of neutral pseudoscalar mesons with a continuum approach. It delivers an understanding of the distribution of valence-quarks within mesons. A unified picture for transition form factors of mesons connecting pion, flavor mixing states and heavy quarkonia will be drawn.
