

QCD物理暨国家自然科学基金重大项目交流会

Wednesday, 17 July 2019 - Thursday, 25 July 2019

Scientific Programme

The detailed physics program can be found at: <https://indico.ihep.ac.cn/event/9824/material/6/0.pdf> (updated July 17)

July 17 will be the arrival day and the program of each day will cover one topic as the following:

July 18: QCD critical point & equation of state (Luo Xiaofeng)

July 19: 3D structure of nucleon and STAR Cold-QCD physics (Xu Qinghua)

July 20: Heavy flavor and strangeness production (Zhu Xianglei)

July 21: QCD medium polarization and chiral vorticity effect (Gao Jianhua, Yi Li)

July 22: Chiral Magnetic Effect in QCD (Chen Jinhui)

July 23: NICA-MPD physics (Huang Mei)

July 24: EIC physics (Zhou Jian)

July 25: Project report on NSFC key project
